Days 1-4: Serengeti North Wilderness Camp

Morning flight from Kilimanjaro International Airport to Northern Serengeti. Your Wild Frontiers guide will meet you at the local Kogatende airstrip and transfer you by vehicle to Serengeti North Wilderness Camp.

Northern Serengeti

The vast, rolling savannah of the Northern Serengeti is interspersed with acacia trees and riverine woodlands. Wildlife can be seen along the banks of the Mara River and visitors can view the annual spectacle of the half a million migrating wildebeest. Commonly spotted wildlife include: a multitude of plains game such as buffalo, zebra, gazelles, impala, giraffe as well as lion and leopard. Visitors can look forward to bird watching, hot air ballooning, game safaris and guided bush walks.

Explore the Serengeti eco-system in our specially customised extended land cruisers with ample leg room and enlarged windows. Our game viewing hatches offer 360 degree views, allowing ease of photography.

Spend your time here enjoying leisurely private game drives with your private guide. This is the place to be between June and November when masses of migrating Wildebeest and Zebra cross over the Mara River.

Overnight for 3 nights: Serengeti North Wilderness Camp [View iBrochure](#)

Serengeti North Wilderness Camp is a 'seasonal' camp located in the north of the Serengeti National Park, a short distance from the Mara River. Seasonal camps have the benefit of being able to move to some of the best game viewing areas of the park, and we work under strict National Park guidelines with the camp being truly eco-friendly. Comprising just ten spacious tents (including a 4-bed family tent), we provide comfortable beds and quality linen, with en suite flushing toilet and 'bush shower'. Lighting is by 12-volt (solar powered) with bedside lamps provided. The tents each have a shady verandah.

An airy, central dining tent complements our comfortable lounge tent which has a small reference library, maps, some games for children and a recharging facility for cameras, videos as well as WiFi.

Our safari chef will prepare sumptuous meals for your enjoyment. Evenings offer a typical safari campfire around which our guests enjoy sundowners and snacks, and relive the day's experiences.

We provide a friendly, intimate quality tented bush camp, with good facilities in an amazing area, with due respect for this fragile ecosystem.

Day 4: End of Itinerary

Transfer back to Kogatende airstrip for the flight back to Kilimanjaro Airport.

End of safari.

Please contact us on reservations@wildfrontiers.com for a detailed quotation

Included

- Return flight from Kilimanjaro International Airport to Kogatende

- All international flights and airport taxes
- Personal expenses such as porters, drinks, tips, visas, health requirements and travel insurance
- Services/activities/meals not included above
- *Optional upgrade to a private game drive vehicle – contact us for rates*

THE MIGRATION EXPLAINED:

The following should be used as a guideline when planning your safari to East Africa – movement of wildlife depends on a great many aspects. The following migration calendar helps to explain the seasonality of game viewing. Remember there is resident game throughout the year in the Serengeti/Ngorongoro eco-systems.

JAN / FEB / MARCH

The large herds of wildebeest are generally in the southern plains of the Serengeti eco-system, calving takes place over approximately two weeks. An abundance of predators, good visibility of game, mix of open plains and some woodland.

APRIL / MAY

The herds start moving toward central Serengeti. This is typically the rainy season, however, game viewing is still excellent and there are some great discounts available at lodges and camps. It generally doesn't rain all day. Conditions for photography are generally superb with moody skies and good depth of colour.

JUNE / JULY / AUGUST

The wildebeest move from the central area and split to the west and north, continuing their trek toward the Mara River. River crossings may be seen in both the western corridor (Grumeti area) and north (Mara River).

SEPTEMBER / OCTOBER

Whilst some of the wildebeest successfully reach the Masai Mara, there are still hundreds of thousands remaining in the northern region of Serengeti, offering those with guests with loads of patience the chance to see exciting river crossings (the Mara River runs through the Serengeti).

NOVEMBER / DECEMBER

The massive herds start to return from the north, to the southern plains, before the cycle repeats again!

TRAVEL INSURANCE: Is compulsory for all guests travelling with Wild Frontiers.

VISA REQUIREMENTS: All visitors to Tanzania must have a valid passport which needs to be valid for 6 months after return date of travel and have at least 3 blank pages in it. Except for exempted countries all visitors require a visa to enter Tanzania. South Africans visiting on holiday currently do not require a visa. Visas are currently US\$ 50 per person, single entry for most other nationalities. An exception is US citizens for whom a single-entry visa is US\$100

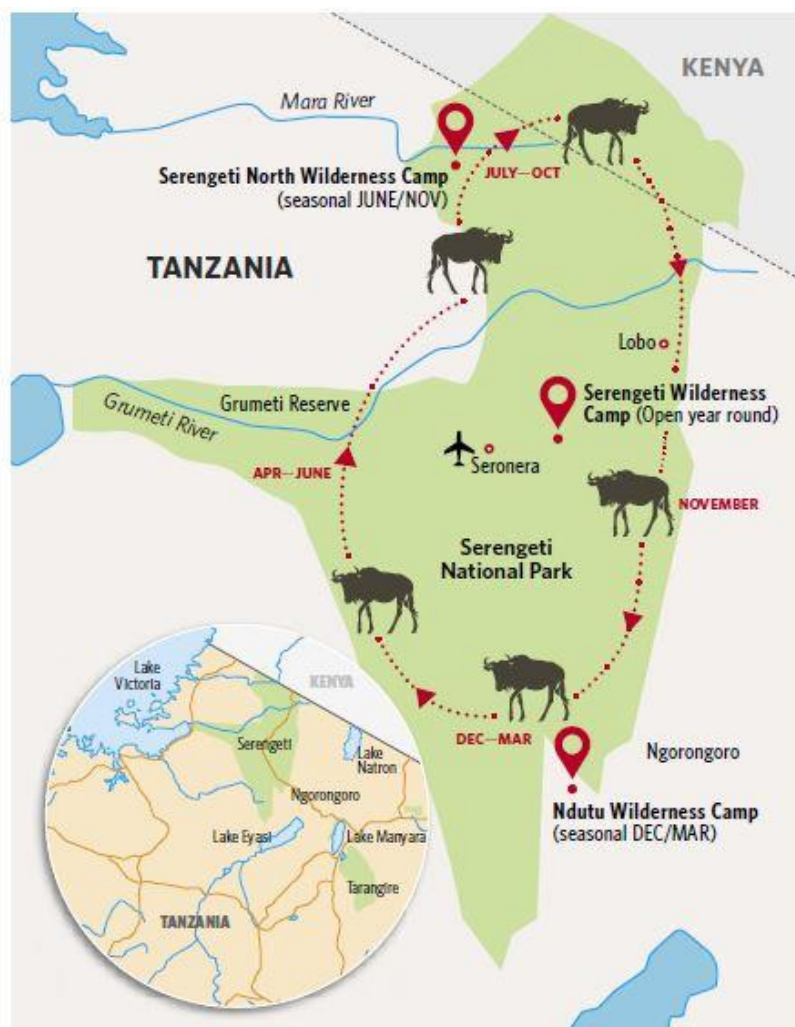

Visitors should apply via the e-visa portal: <https://eservices.immigration.go.tz/visa>.

Visas are issued within 2 - 3 weeks.

HEALTH REQUIREMENTS: Please contact us for the latest Covid travel/ entry requirements.

Yellow fever vaccines are no longer required to enter Tanzania unless you have been via an endemic area. However, on the ground, it often differs and you may be asked for Yellow Fever certificate, even if you have only been in transit via Nairobi. We strongly suggest you have a Yellow Fever vaccination, as regulations can change and often staff at border posts have the incorrect information on this, which can cause delays. (For a list of countries with risk of yellow fever transmission and countries requiring yellow fever vaccination click [here](#))

Precautions against Malaria are also recommended.
